IEEE INSPEC SPI Other \_\_\_\_\_

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic that meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to define the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Please search claim 29 Amended 2/20/06.

Please call so we can talk about the invention and allowable feature.

g06f-017?

# STIC Search Results Feedback Form

## EIC 3600

Questions about the scope or the results of the search? Contact *the EIC searcher or contact:*

**Karen Lehman, EIC 3600 Team Leader**  
**(571) 272-3496 Knox 4B68**

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

**Drop off or send completed forms to EIC3600 Knox 4B68**

WEB sites -- Authorship

**Geographic Terms:** UNITED States

**Author-Supplied  
Keywords:** Bloomingdale's

**Abstract:** Reports on the ambitious plans Bloomingdale's has for its Web site. Says the company will offer high-priced clothing and accessories at the site, using interactive technology that does not require visitors to download plug-ins or viewer software. Notes Live Picture Flashpix file formats will enable visitors to zoom in on detail as fine as stitch quality or fabric texture, view different regions of a panoramic scene, and examine object from different angles. Adds the company's aim is to offer a comprehensive shopping environment, providing an experience similar to being in the brick-and-mortar store. Says users will have access to many of the same services available at the store, including fashion advice and shopping profiles. Adds that Live Picture's server-based technology will be used to recreate the environment at Bloomingdale's flagship Manhattan store. Includes one sidebar.

**Keywords:**

**Company/Entity:** NETSCAPE Communications Corp.

**Abstract:** Reports that both Netscape Communications Corp. of Mountain View, CA and Microsoft Corp. of Redmond, WA actually refer to a range of solutions when they talk about the push portions of their respective Web clients. Explains that both companies highlight simple offline browsing when questioned about the proprietary nature or complexity of their products, but describe a range of attributes when doing feature comparisons. Remarks that both mean that a user can subscribe to a Web page and have it pre-cached automatically. Adds that they claim that no changes are required when a site is converted to a channel. Concludes that building a channel actually requires altering a page into its component parts and developing a structure for delivering sub-channels based on user preferences. Includes one screen display and one chart.

**Document Type:** Article

**Subject Terms:** APPLICATION software -- Development  
OBJECT-oriented methods (Computer science)

**Geographic Terms:** UNITED States

**Abstract:** Discusses object-oriented analysis and design methodologies (OOAD) and various approaches to using them. Says thinking of a problem in terms of objects and object classes is the only aspect of OOAD that differentiates it from traditional analysis and design. Adds that all major OOAD methodologies have a similar basic view of objects, classes, inheritance, and relationships. Notes that choosing a methodology requires considering its features as well as the cost of using it, the types of problems to which it is best suited, its limitations, and the available training. Also says all the methodologies suffer from the same basic flaws. Includes two diagram, two charts, and a product resource guide.

Altima Systems

**Company/Entity:** HEWLETT Packard Co.

**Abstract:** Presents a buyer's guide to 486 subnotebook computers. Features a table comparing 22 features of six products from six companies. Includes standard feature configurations, battery performance, portability information, support and warranty, and prices. The accompanying article includes a short review of each product, graphs comparing word processing power, spreadsheet speed, database throughput, graphics performance, battery life test, desktop publishing, and software development, a photo of each computer, a listing of test results for each, and vendor information. Concludes that the Zenith Data Systems Z-Lite 425L has many strengths and few weaknesses, but notes that the Toshiba Portege T3400 is clearly the best choice if you have the money. The Toshiba was awarded "High Honors." Includes six photos, seven graphs, one table, and six test results listings.

**Notes:** Product Rating: Toshiba Portege T3400: A; Zenith Z-Lite 425L: B; Epson ActionNote 4000: B; Altima Traveler: B; HP OmniBook 425: B

AMIGA (Computer)

**Geographic Terms:** UNITED States

**Author-Supplied** Aladdin 4D

**Keywords:** Adspec

**Abstract:** Presents a mixed review of Aladdin 4D v2.3 (\$499), a 3D rendering program from Adspec of Salem, OH. Requires an Amiga computer system. Says program contains many unusual and powerful rendering commands and uses a single viewing port with views available from top, bottom, front, and side. Says its features include special abilities for creating gases allowing the control of color, turbidity, movement, and density; extensive surface attribute control; surface morphing; and notes it is the only program to allow JPEG-format bitmaps for texture maps. However object morphing is the only morphing allowed; it does not include refractive indexing for transparent objects; documentation is poorly organized; and it does not include simple geometric shapes, meaning that every object must be created from scratch. Concludes it is a powerful system but user interface is not easily learned. Contains one screen display and a table comparing features.

**Document Type:** Product Review

**Subject Terms:** SOUND  
AMIGA (Computer)

**Geographic Terms:** UNITED States

**Author-Supplied** DSS8

**Keywords:** Great Valley Products

**Abstract:** Presents a very favorable review of DSS8+ Digital Sound Studio (\$99, \$59 trade-in for any audio sampler), an audio digitizer from Great Valley Products of King of Prussia, PA. Requires an Amiga with a minimum 1MB RAM, a sound source with line-level outputs and RCA connectors or a microphone, although a recommended system would include a hard drive, 2MB RAM, MIDI interface, amplified speakers or outboard audio system with AUX input. Says it has improved on the previous version (DSS8) by eliminating adjustment controls on the hardware that plugs into the parallel port, placing those controls in the software. Says other features such as mono sampling up to 51KHz; stereo sampling to 42KHz; full cut/copy/paste editing; real-time oscilloscope and spectrum analysis displays; along with support for IFF, SONIX, and RAW file formats, and ARexx are very similar to the previous version. Includes one screen display.

**Company/Entity:** BORLAND International Inc.

**Abstract:** Presents a buyer's guide to Xbase cross-platform development database tools. Features a table comparing 6 products from 6 manufacturers, including pricing, platforms available, Xbase compatibility, and comments. Says there is no Xbase language standard, so that users and developers must choose a dialect to work under, and notes that different platforms require different approaches to development. Sidebars describe examples of implementations at various sites, where requirements included: developing textual database programs for state-wide university extension services; capturing employee timesheet information throughout a large organization; replacing a manual-entry system; and tracking problems in software packages. Notes the importance speed, platform portability, cost-effective maintenance, and licensing costs in choosing certain packages. Includes one table.
